## Areas of Expertise

Expert	Node.js • React • Python • SQL • noSQL • AWS • Git • TDD
Proficient	GraphQL • Go • Kubernetes • Docker
Familiar	Typescript • React Native • Next.js • Deno • Rust

## Work Experience

### Cofounder - Sundial Time Study Solutions

9/2020 - Present

- From scratch, built a product to track employee hours worked by category, addressing the needs of several transplant centers across the US

### Software Engineer - Pluralsight

9/2019 - Present

- Built Q&A product on Skills platform
- Through VOC and analyzing customer data, discovered a need for public community
- Navigated technical challenges in order to integrate public community into existing product

### Picshaire

5/2018 - 12/2020

- Created an app for my wedding, essentially a shared photo album across all devices
- Published on app store until last year, wasn't worth it to maintain and keep up with Apple policies

### Software Engineer - InsideSales.com

1/2017 - 9/2019

- Built features for and maintained flagship product
- Led team's efforts for a new analytics reporting service
- Architected and implemented a system of RESTful API's to enhance bulk user management tools within Salesforce
- Worked across teams to implement several big-dollar features which required effort from other groups within the company
- Designed and built integrations with third-party APIs, driving the product towards becoming a "platform"

## Education

### Brigham Young University

2014 - 2018

*B.S., Computer Science*
